

ONLY THE STRONGEST SURVIVE.

StrongBox batteries—tough enough for ag applications and, of course, everything else—Automotive • Marine • RV & ATV • Construction • Lawn & Turf Care

RoadGard™
Improved resistance to

- overcharging • Low maintenance—no need to add water during normal service life
- Unique lead alloy formula offers superior resistance to grid corrosion
- Superior reserve capacity
- Full frame cast grid increases strength and durability
- Dry-charged for the freshest battery at time of sale.

Performance
Heavy-duty poly containers

- Hot-melt installation protects against vibration damage
- Through-the-wall, welded intercell connectors provide quick starts and increase power in extreme conditions
- Envelope separators eliminate electrical shorts and prevent corrosion
- Heavy-duty grids provide enhanced durability.

Spiral Energy
Six-valve isolated design

- allows gas to escape in the event of an overcharge
- Extra-heavy duty straps create superior conductivity, strength, and durability
- Through-the-partition weld design ensures ultimate conductivity and resistance to vibration
- Vitreous separators aid in recombinations and faster recharge.

Think all batteries are the same? Don't be so sure. A tractor requires a battery a lot tougher than the one you'd put in your truck. John Deere StrongBox batteries can outlast ordinary car batteries by more than 800 percent, so just imagine how well they'll perform in your everyday applications. John Deere StrongBox.
