

# WOODS<sup>®</sup> BrushBull<sup>™</sup> POWER

WOODS<sup>®</sup>BRUSHBULL<sup>™</sup>

Woods' BrushBull<sup>™</sup> rotary cutters give you the versatility you need while the rugged deck design provides added durability. The BrushBull's contoured rear frame, bumper and smooth deck offer best-in-class strength and longevity.

- 3"x4" structural beams extend through entire deck plate providing maximum frame strength.
- 12-1/2" deep deck handles even more material, improving efficiency and performance.
- Rear 2" tubular bumper welded between deck plate and deck skirt adds more strength and prevents damage when backing over heavy brush.
- Rear metal band deflector and rubber front belt shields for safe operation.
